**SKU:**T4X1070DMN

**Price:**\$359.99

**Categories:**[DR Wholegoods](#)

### **Product Description**

## **DR Pilot Trimmer Mower**

At just 55 pounds, the PILOT is our lightest, easiest-to-maneuver gas-powered trimmer on wheels. But it has the muscle to vastly outperform any handheld trimmer on the market...without the hassle or the back pain!

### **DR Pilot Trimmer Mower Features -**

#### **Super-duty Cutting Cords**

All DR Trimmer/Mowers accept super-thick 175 mil cutting cords—the thickest, longest-lasting in the industry (so you spend more time mowing and less time changing cords).

#### **Patented Cord Attachment System**

Attach new cords in seconds, without tools! Choose from one of five cutting heights (1.5" to 3.5") when you attach new cords. And the DR wide-body design prevents vegetation from wrapping and tangling around the trimmer head, even in tall grass.

#### **Assembled in the USA**

Assembled in the USA using foreign and domestic parts. Ships direct from our Wisconsin factory.

#### **DR OHV Engine**

This powerful DR engine produces 7.0 ft-lbs of torque and delivers over 5X the power of any handheld string

trimmer. It gives you the power you need to take care of all your trimming needs easily and efficiently and mow thick grass and weeds.

### **Optional Beaver Blade for the big stuff**

The optional Beaver Blade turns your trimmer into a chainsaw on wheels. Cuts trees up to 3" in diameter quickly and easily. It's the perfect way to take down stands of "weed trees" without bending over or dropping to your knees like you have to with a normal chainsaw.

### **Optional Quick-Lock Trimmer Head**

Allows you to change your trimmer cord in just seconds—completely hassle-free! Cord is simply inserted into the head and is anchored in place by the unique gripping mechanism! Perfect for quick cord changes in the field, and for those who often trim dense thickets of weeds.

### **Optional DuraBlades for 3/8" Thick Brush**

With our optional DR DuraBlades, you can quickly swap out your cutting cords with metal blades, embedded in a high-tech polymer, that slice through woody material up to 3/8" thick!
