Product Description

Husqvarna 520iHD60 Hedge Trimmer

The Husqvarna 520iHD60 Hedge Trimmer, with a 24-inch double-sided blade, offers quiet electric power for efficient and professional commercial performance.

This hedge trimmer runs on a 36 V Li-ion battery that's long-lasting and easy to charge. Pitch the trimmer into savE™ mode when you want to get the most effective use out of your battery without sacrificing power. When you go electric, you also avoid the mess of refueling, can maximize your working time, and get quieter operation ideal for trimming the hedges in noise-sensitive neighborhoods.

Featuring an ergonomic design, this hedge trimmer is easy to use and adjustable for more comfortable operation. A pivoting rear handle paired with the double-sided blade allows you to adjust your grip depending on the angle you're cutting at and clip hard-to-reach spaces just as effectively as the rest.

Battery and charger are NOT included.
