Product Description

Goldens' Cast Iron Half Grate for 18" – 18.25" Ceramic Cookers

Problem: Most 18" ceramic cookers are not really 18"! They only allow 15-16" of cooking area, due to the thickness of the firebox, reducing your direct grilling capacity by 30%!

Solution: Our Goldens' Cast Iron Grates for 18" – 18.25" lift your cooking surface by 3" and expands your grilling area from 16" to nearly 19", upsizing your grill to 347 square inches of cooking area, turning your kamado into a larger cooker while direct grilling! That means more room for more Ribeyes!!! Our grates have cast iron supports that raise your cooking level by **3 inches**, near the felt line, eliminating the need for those cheap, clumsy stainless steel rack systems! Our quality American-made cast iron grates fit your large and classic-size ceramic kamados!
